

What happens to your benefits if you retire from HPE

For purposes of this chart, you're generally considered to be "retiring" if you leave HPE at age 55 or older with at least 10 years of qualifying service (or for equity grants, age 55 or older with at least 70 combined age-plus-service "points"). You may also be considered to be retiring if you leave HPE at any age with combined age-plus-service "points" equal to 80 or more. The definition of retirement varies by program, and the applicable program provisions govern regardless of any alternative provisions or early retirement programs that may have been offered in the past.

Once you retire, you can also refer to the [U.S. Benefits Summary Plan Descriptions](#) applicable to you as a retiree, or call the HPE Benefits Center at 1-844-537-5304.

If you're leaving under a severance or workforce reduction program, or a divestiture, special considerations may apply.
